

**LOGANSPOUR STATE HOSPITAL**  
**Facility Fact Sheet**  
**SFY 2010**

Logansport State Hospital (LSH) has served persons with mental illness since 1888. In 1993, a new facility was opened that houses a majority of the patients. In August 2005, the new Isaac Ray Treatment Center was opened with a 63 bed capacity and was later expanded to 84 with the ability to expand to 105 beds.

Logansport State Hospital has redoubled efforts over the past several months to make ready for the upcoming CMS survey. The focus has intensified on meeting the two special conditions of staffing and active treatment, and on completing all written applications. Recently, we sent a formal request to CMS to prioritize the LSH survey so as to become certified as soon as possible. Our Joint Commission survey is also scheduled to occur this spring. We continue to maintain JC accreditation over the entire facility and certification by CMS as an Intermediate Care Facility for the Mentally Retarded, for the Jayne English Service Line.

The hospital is composed of five Service Lines that provide care to adults with mental illness and/or persons who are developmentally disabled. The Service Lines are:

- **Dodd Treatment Center:** This is a 96 bed unit. Admission stabilization and intermediate care services are provided to patients with various psychological presenting problems. Forensic services are also provided for females. Males with ICST designation and other legal charges are also served on Dodds. Dr. Justin Boyce, Service Line Manager.
- **Isaac Ray Treatment Center (IRTC):** Currently 84 beds with plans to expand to 105 beds. The forensic service line serves individuals who are incompetent to stand trial, individuals who have served their sentences with the Department of Correction (DOC) and continue to need mental health services, individuals found not guilty by reason of insanity and those individuals with mental illness and severely dangerous behaviors. Jerilyn Smith, Service Line Manager.
- **Jayne English Treatment Center (JETC):** This is a 48 bed unit, Intermediate Care Facility for the Mentally Retarded. This unit serves individuals who are Developmentally Disabled with Mental Illness or have Severe Behavioral Problems. Paul Wright, Service Line Manager.
- **Southworth Treatment Center (SWTC):** Southworth West (SWW) is a 32 bed unit; Southworth South (SWS) is an 8 bed unit; C.L. Williams (CLW) is an 18 bed unit; and Larson 1E (L1E) has 14 beds. SWW facilitates community integration; SWS completes the transition program; CLW provides services to geriatric males, and L1E is the female geriatric and medical services unit. Steve Barlow, Service Line Manager.
- **Larson (LTC) Continuous Psychiatric Services:** An 86 bed unit. This unit houses the specialty programs of Sexual Responsibility, Fluid Management, and Continued Psychiatric treatment. This unit also treats individuals that have behavioral issues. Pam Kindem, Service Line Manager.

Treatment is individualized through interdisciplinary assessments and may include stabilization of symptoms through psychopharmacology, management of medical problems, individual and group therapy, patient and family education, rehabilitation and recreation therapy, academic and skills training, vocational training including pre-vocational skills as well as patient payroll program.

Various types of training programs implement bio-psychosocial learning programs, including groups on medication management, anger management, coping skills, community re-integration, social skills development, and adult living skills such as money management and cooking, etc.

**State Fiscal Year 2010 (July 09-Feb 10)**
